NEWS RELEASE

POSTIVE RESULTS IN ENGINEERING, TESTING & OPERATIONS

JULY 25, 2017

REGI U.S., Inc. ("REGI" or "RGUS" or "the Company")

Board of Directors, Regi U.S., Inc. and its wholly owned subsidiary, RadMax Technologies, Inc., are pleased to announce successful Engineering improvements, prototype testing, achievements in continuing funding from investors and OTCQB and MorningStar approvals.

All certifications and compliance for listing on the OTC QB investment market board have been approved. In addition, Reg are now reviewed and listed by Morningstar and carry level II market data on the otcm Markets.com, "RGUS".

Individual shareholders continue to believe in our technology and support its development through funding of operations within our Senior Secured Convertible Loan Program. An additional \$500,000, USD, was raised this month, filling our cash flow budget through the first of the year 2018.

Through our research, testing and prototype evolution, the Board of Directors also announce the filing of two new patents, three provisional patents and refiling as existing Canadian Patent with the US patent office. Protecting our unique (IP) Intellectual Property is key to our success. In addition, other designs and RadMax technology enhancements are on the drawing board for future patent consideration.

Paul Porter, VP and Chief Engineer manages the research and extensive testing within our own lab. For the last two months, Paul Porter and his team have maintained continual testing on material selection, Vanes and Cam interface and mechanical design. Additional testing of pressures, temperatures, friction ware and variable speeds have defined our first full testing stand components for our Gas Expander.

Success in building and furnishing our own internal fabrication and testing lab, have improved prototype development, cost savings and protection of our IP.

Theoretical and mechanical design on additional devices has evolved to where additional engineers and specialized lab personnel are being recruited to move multipole prototypes forward.

With continued support from our forward thinking shareholders, to engineering and design of multiple prototypes and improvements to our market presence, Paul Chute, CEO, believes RadMax Technologies is fulfilling its dream of bringing this revolutionary technology to market.

We continue to evolve our new website radmaxtech.com, and encourage all investors to follow our progress.

ON BEHALF OF THE BOARD OF DIRECTORS

Regi U.S., Inc.
Paul Chute
President and CEO

ABOUT REGI U.S., INC.

RadMax Technologies, Inc., the wholly owned subsidiary of REGI U.S., Inc., is developing for commercialization multiple improved axial vane type rotary devices using our Patented RadMax™ Rotary Technology. This Technology allows for revolutionary designs of lightweight and high efficiency engines, compressors pumps and other devices. One current prototype, The RadMax™ engine, has only two unique moving parts, the vanes (up to 12) and the rotor, compared to the 40 moving parts in a simple four-cylinder piston engine. This innovative design makes it possible to produce up to 24 continuous power impulses per one rotation that is vibration-free and extremely quiet. The RadMax™ engine also has several capabilities allowing it to operate on fuels including gasoline, natural gas, hydrogen, propane and diesel. For more information, please visit radmaxtech.com

READER ADVISORY

Statements in this press release regarding the business of and REGI U.S, Inc. (together the "Companies") which are not historical facts are "forward-looking statements" that involve risks and uncertainties, including management's

expectation on closing the second tranche of the private placement, certain of which are beyond the Companies' control. There can be no assurance that such statements will prove accurate, and actual results and developments are likely to differ, in some case materially, from those expressed or implied by the forward-looking statements contained in this press release. Readers of this press release are cautioned not to place undue reliance on any such forward-looking statements.

Forward-looking statements contained in this press release are based on a number of assumptions that may prove to be incorrect, including, but not limited to: the impact of competitive products and pricing, the Companies' dependence on third parties and licensing/service supply agreements, and the ability of competitors to license the same technologies as the Companies or develop or license other functionally equivalent technologies; financing requirements; changes in laws, rules and regulations applicable to the Companies and changes in how they are interpreted and enforced, delays resulting from or inability to obtain required regulatory approvals and ability to access sufficient capital from internal and external sources, the impact of general economic conditions in the United States, industry conditions, increased competition, the lack of availability of qualified personnel or management, fluctuations in foreign exchange, stock market volatility and market valuations of companies with respect to announced transactions. The Companies' actual results, performance or achievements could differ materially from those expressed in, or implied by, these forward-looking statements, including those described in Regi U.S., Inc.'s financial statements, management discussion and analysis and material change reports filed with the United States Securities and Exchange Commission at www.sec.gov, and REGI's Form 10-KSB annual report filed with the United States Securities and Exchange Commission at www.sec.gov. Accordingly, no assurances can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what benefits, including the amount of proceeds, that the Companies will derive therefrom.

Readers are cautioned that the foregoing list of factors is not exhaustive. All subsequent forward-looking statements, whether written or oral, attributable to the Companies or persons acting on its behalf are expressly qualified in their entirety by these cautionary statements. Furthermore, the forward-looking statements contained in this news release are made as at the date of this news release and the Companies do not undertake any obligation to update publicly or to revise any of the included forward-looking statements, whether as a result of new information, future events or otherwise, except as may be required by applicable securities laws.
