NEWS RELEASE

Regi U.S., Inc. Plan of Action Update

October 29th, 2020

REGI U.S., Inc. ("REGI" or "RGUS" or "the Company")

The Board of Directors, Regi U.S., Inc. and its wholly owned subsidiary, RadMax Technologies, Inc., announce the following updates to our phase 2 Plan of Action.

Our efforts to continue operations during this depressed economic time show progress along several fronts:

- During October, we demonstrated in Texas our RadMax expander technology to several Oil & Gas industry producers and related industrial equipment suppliers. Our expander prototypes successfully ran both as stand-alone units and on supplied test platforms providing proof of expected electrical energy conversion from pressure differentials in gas flow.
- We have identified additional joint development and application opportunities.
- Our field trials have provided valuable data which is being used to improve expander design in the areas of materials selection, vane performance, improved generator efficiency, flow filtering requirements, control systems, and application management.
- We continue to refine our expander designs for reducing methane emissions leading up to commercialization of the product in mid to late 2021.
- Discussions on select projects with multiple parties are ongoing with the purpose of accelerating the timeline for the introduction of commercial products.
- We are continuing to search for a strategic business relationship with a midlevel manufacturing company who seeks to expand or diversify their product lines. Based on "common core" technology, RadMax expander and compressor products add efficiency to, and are suitable for use in various Oil & Gas industry, HVAC, steam, waste heat recovery, water desalination/processing and other industrial applications.

Our current financials do not have any material changes from those publicly reported in our 3rd quarter filings. Further balance sheet improvements are expected to be limited by the continuing COVID-19 economic conditions.

We encourage all investors and interested parties to follow our progress routinely posted on our website radmaxtech.com, and our RGUS listing on the OTC web site.

ON BEHALF OF THE BOARD OF DIRECTORS

Regi U.S., Inc.
Paul W. Chute
CEO, CFO
