To all our families, friends, shareholders and affected parties

We at Regi U.S., Inc. / RadMax Technologies offers our best wishes to all affected by the Covid-19 virus and trusting you are safe.

Our business, like almost all others, has being affected by the economic and social effects of the virus and we are having to respond in the best interest of all. Our primary concern is for the safety of our staff. In accordance with State of Washington directives, our operations will be paused immediately and remain closed until at least the middle of April or until the State issues new directives.

Some operations, such as engineering design, may continue as possible from home, but all technical laboratory and prototype manufacturing work will be deferred until operations are allowed to resume.

Updates will be made available as we manage this interruption to our progress.

Wishing you all the very best and please stay safe.

The Regi U.S., Inc. team
